1941

Management

Jan-Olof Åkerström, Managing Director

Company profile

Dellner Brakes AB exhibits for the first time at LogiMAT 2012.

As a leading manufacturer of stopping, turning and locking solutions **Dellner Brakes AB** shows products specially designed and manufactured for the stacker crane industry.

The **spring applied, hydraulic released SBS (Safety Brake System)** and the **spring applied, electro mechanical released DELECT, EMP** brakes act directly on the stacker crane travel rail head, eliminating the need for hydraulic buffers and optimizing the utilization of warehouse space. The brake systems are able to stop the stacker crane movement anywhere in the aisle.

These robust designed and compact “bolt-on” brake systems are easy to adjust requiring minimum maintenance.

Dellner Brakes AB further shows **hydraulic applied, spring released SKD** brakes, designed to hold the stacker cranes loading platform in position during the loading and unloading process.

All Dellner products are available for normal temperature and deep freeze warehouses. Please come and visit us!

Products on display at LogiMAT

- SBS (Safety Brake System)
- Delect, EMP (Brake)
- STL (Stopping, Turning and Locking System)
- SKD (Brake)
