Company profile

Replica Sistemi is a company specialized in the design and implementation of software applications integrated with each other and interfaced with the most advanced RF Bar-Code readers, Voice and RFID technologies.

Over 1,000 manufacturers and distributors operating in diverse merchandise sectors and more than 40,000 daily users chose Replica Sistemi's software for the management of warehouses logistic flows. Today Replica Sistemi is an efficient provider of complete and integrated solutions for the Supply Chain management.

Replica Sistemi group employs 140 people and generates annual sales for 17 million Euros.

Replica Sistemi's skills and experience has grown being close to customers' needs; on-going dialogue with users and constant ICT solutions investment in R&D allow Replica Sistemi to understand and anticipate market demand and continuously improve its products.

LOGISTICS AND TRANSPORT

Replica Sistemi's Logistics and Transportation line offers software for planning and controlling the warehouse and managing the shipment of products and the relative trips.

INTEGRATED TECHNOLOGIES

Replica Sistemi fronts the whole logistic process as a single supplier offering software solutions integrated with RF, RFID and Voice devices.

Replica Sistemi has customers in Italy and abroad and, thanks to its own sales and technical network, supports the process of growth and internationalization of companies strategically conquering global markets.

Exhibits at LogiMAT
