Media Event

Locus Robotics

Booth ES30 – Entrance East

11:00 – 11:30 AM

Locus Robotics Media Update 2024: Leading innovation in the warehouse automation industry- even in uncertain economic times

Denis Niezgoda, VP EMEA & APAC at Locus Robotics, welcomes you to our LogiMAT Media Update 2024.

Join us for a coffee and a lot of information on Locus Robotics, our latest customers, recent technology developments and the path ahead for us as well as the industry.

Today's uncertain economic landscape requires companies to adapt and in the warehouse industry, when deciding about the future of the business, scalability, flexibility, and sustainability are key to better be able to face any challenges.

- Learn more about how we helped companies adapt these challenges and improved their operations and overall results, including brands like UPS Healthcare, ABB Optical, United Drug or ITG.
- See our Vector and Origin models in live-demos and find out more about Vector's success since its' EMEA-launch at LogiMAT last year.
- Find out how Locus Robotics continues to implement AI, data analytics and superior navigation of robots to further increase the value for customers.

Following the presentation, Denis Niezgoda is also available for personal meetings at the show.

To make planning smoother, we kindly ask you to send us a short confirmation to breichert@locusrobotics.com if you are planning to attend.

We are looking forward to meeting you!

Invitation to Product Premiere / Press Event

4am Robotics

East Entrance, Stand ES43

11:15 AM

We are excited to announce that at this year's LogiMAT, we will be unveiling our latest innovation, the Autonomous Mobile Cobot AMC-H, for the first time to you and the industry audience. We cordially invite you to join us for this exclusive unveiling on the first day of the trade fair. Be among the first to catch a glimpse of our latest development and learn firsthand how it elevates intralogistics to a new level.

Date: Tuesday, March 19, 2024

Time: 11:15 AM

Location: LogiMAT 2024 / East Entrance / Stand ES43

Program:

- Unveiling of AMC-H
- Address by Jochen Carle, Managing Director 4am Robotics (5 min)
- AMC-H's Unique Selling Points: Gripper System / Payload, Range, and Towing Capacity (10 min)
- Public Q&A

Following the program, our experts will be available for interviews and further information. In addition to 4am's **AMR**, our booth will showcase the entire world of intralogistics. 4logix Intrasolutions, one of our partner companies within the SCIO Automation Group, will be happy to provide you with further information on **Warehouse & Logistics solutions**. Additional contacts for the joint competence area of **Simulation, Virtual Commissioning, and Digital Twin** will also be available for your inquiries.

Kindly confirm your attendance by **March 8, 2024**, via email to martina.wolf@4am-robotics.com, and let us know if you are interested in scheduling a discussion/interview on any specific topic.

We look forward to welcoming you at the fair and presenting our exciting new product to you!

Press Conference in the Press Centre

TUP

Conference room, Press Centre

14:45-15:15 PM

Language: German

"AI in intralogistics - Practical use in warehouses" in the conference room of the Press Centre at Messe Stuttgart, Entrance East

One of the hottest topics in logistics is the challenge to find skilled workers. Therefore, it is important to realize all the optimisation potential that exists when planning with existing personnel and resources in warehousing operations. This is where the AI-supported solutions offered by the intralogistics experts from Southern Germany and their partners can play a vital role. Mathias Thomas, CEO of TUP and AIM, and Fin Geldmacher, CEO of prismaT and INLAI, will present their approach in this field on the opening day of LogiMAT. They will explain where promising opportunities for improvement can be identified and how thanks to state-of-the-art IT, these can be implemented now and in the near future for more efficient warehouse processes, regardless of the platform.

After the press conference, the two speakers will be available for discussions on this and other intralogistics topics with interested media representatives and visitors at the TUP stand (8A29) and the prismaT stand (8B37).

Please send your confirmation for your participation to redaktion@tup.com. Contact: Yannic Kollum, TUP

Media Cocktail

stow International NV

Hall 3, Stand 3B67

5PM

Exclusive Cocktail Networking Event at stow Group & Movu Robotics booth

Dear Media Partner,

We are excited to invite you and your team to join us for an exclusive Media Cocktail at our booth during the upcoming LogiMAT. This event will provide an excellent opportunity for you to connect with our experts, explore innovative developments, and forge valuable relationships.

Event Details:

Date: Tuesday, March 19th

Time: 17:00 - 18:00 PM

Location: Hall 3, B67

Highlights of the Media Cocktail:

Exclusive Access: Gain access to our latest announcements and company updates. This event offers an exclusive preview of our innovations and a chance to secure unique stories and insights for your audience.

Networking Opportunities: Engage with our C-Level Management and our industry experts in a relaxed and conducive environment. Exchange ideas, gather insights, and establish connections that could lead to compelling stories and collaborations.

Exclusive Interviews and Demos: Seize the opportunity to enjoy one-on-one conversations with our experts and executives to delve deeper into our products, services, and vision. Experience exclusively a live demonstration of an innovative, automated and seamless material flow and gain firsthand insights into the features and functionalities of the stow Group technologies.

Please RSVP at your earliest convenience to reserve your spot at this exclusive event. We value your partnership and look forward to the chance to connect with you at our Media Cocktail.

Should you have any questions or require further information, please feel free to contact us. Thank you for considering our invitation, and we eagerly anticipate your presence at our booth.

Warm regards,
stow Group

Wednesday, March 20, 2024:

Invitation || Toyota press breakfast at LogiMAT 2024

Toyota Material Handling Deutschland GmbH

Hall 10, Stand 10H48

8:30 AM

Dear Ladies or Gentlemen,

in just a few weeks, LogiMAT, the international trade fair for intralogistics solutions and process management, will once again open its doors in Stuttgart. To kick off the second day of the trade fair, we kindly invite you to our press breakfast.

When: Wednesday, 20.03.2024, 8:30 - 9:30 a.m.

Where: LogiMAT - Messe Stuttgart, Hall 10, Stand 10H48

In addition to TMHDE Managing Director Jan Lorenz, other interesting experts await you in a relaxed atmosphere. You can find out more about our new products and innovations on a guided tour of our stand.

We look forward to receiving your **registration for the press breakfast by 11.03.2024** by e-mail to presse.pr@de.toyota-industries.eu. Please also send **individual interview requests** to the above e-mail address **by 15.03.2024**. We will then be happy to contact you to arrange an appointment.

We look forward to your visit in Stuttgart.

Wednesday, March 20, 2024:

Press breakfast at the exhibition stand

BEUMER Group

Hall 5, Stand 5C51

10:00 AM

"Easy to do business with" - this is the motto of BEUMER Group's trade fair appearance at LogiMAT 2024 in Stuttgart. How can intralogistics processes be further simplified and optimised? What role do the intelligent use of data-based knowledge, software solutions and the BG Pouch System pocket sorter play? Answers to these - and other - questions will be available from 19 to 21 March at stand 5C51 in hall 5.

The following topics await you:

- With the **Global Diagnostic Centre**, we are introducing a new service with which customers can monitor and analyse their process data live and create forecasts.
- Rethinking intralogistics software. We are presenting a new software concept based on the tried-and-tested **Flow Software Suite**.
- E-commerce and omnichannel business models are all about processing as many items as possible per hour in the smallest possible space. **Pouch systems/pocket sorters** offer many advantages here.
- Our experts have long been working on the **dark warehouse scenario** and the question of when a warehouse can do without human labour and which technologies are required for this. Robotic systems play an important role here.
- We also present current innovations in the field of **loop sorters and stretch hood technology** for transport packaging during goods handling.
